Campus Alert System

For the Spring 2021 semester the Pandemic Response Team has launched a new Campus Alert System to monitor Covid-19 metrics at both the campus and city level, to help us track how the virus is affecting the community.

This system uses a tiered approach to guide decisions on tightening or loosening risk mitigation measures to protect the health and safety on campus — and to communicate with North Park students, faculty and staff about any actions taken throughout the semester.

Based on key data indicators, this system will place campus operations at Level 1 (New Normal), Level 2 (Moderate Alert), Level 3 (High Alert), or Level 4 (Very High Alert), with restrictions and additional mitigations corresponding with each level. You can see North Park’s current status and read more about this system on our pandemic planning website.

This semester North Park will also be publishing more campus data related to Covid-19 on the new Campus Dashboard, where students and employees can monitor the data points referred to within the Campus Alert System.
