These key indicators represent the effect of the pandemic on the North Park campus community and the City of Chicago. This alert system will be used by the Pandemic Response Team to monitor campus and city trends, react to any growing concerns, and communicate actions taken with students and employees throughout the academic year. The guiding principles for decision-making continue to be the protection of the overall health, safety and wellness of the campus community, and maintaining a quality academic and residential experience for all students.

Prevalence of Covid-19 is low on campus and in Chicago. New cases on campus are rare, with known source of origin. Little to no evidence of community spread on campus. Available campus isolation space is high. Sufficient hospital capacity with low case numbers/positivity rates in Chicago. Campus and city testing and contact tracing capacities are sufficient.

- Wear facial covering if required/recommended by state, city and/or CDC
- No physical distancing requirement on campus
- Daily self-screen for symptoms of Covid-19, stay home when sick
- Follow outlined Campus Covid-19 Policies

Prevalence of Covid-19 is low to moderate on campus and in Chicago, and/or new cases are increasing, most with known source of origin. And/or early signs of community spread on campus. And/or available campus isolation space is decreasing steadily. Hospital capacity is decreasing steadily and/or case numbers and positivity rates are worsening in Chicago. Campus and city testing and contact tracing capacities are moderate.

- Watch metrics closely for persistent negative trends. Pandemic Response Team is on alert.

Early consideration for:
- Physical distancing in group settings and/or gathering limits
- Increased virtual or hyflex activities for class and other meetings
- Increase in SHIELD testing
- Increased restrictions in dining hall, Helwig, Residence Life & Housing

Prevalence of Covid-19 is high on campus and city over time, and/or new cases are further increasing, often without known source of origin. And/or mounting evidence of community spread on campus. And/or available campus isolation space continues to diminish. Hospital capacity continues to decline and/or case numbers and positivity rates continue to rise without signs of flattening in Chicago. Campus and city testing and contact tracing capacities are stressed.

- Pandemic Response Team monitoring campus and city trends very closely

Strong consideration for:
- Physical distancing in group settings and/or gathering limits
- Increased virtual or hyflex activities for class and other meetings
- Increase in SHIELD testing
- Increased restrictions in dining hall, Helwig, Residence Life & Housing
- Suspension of high-risk activities on campus

Critical level. Prevalence of Covid-19 has increased significantly on campus and city over time, with signs of uncontrolled spread within campus community. And/or available campus isolation space is very low. And/or hospital capacity, severe outcomes, and hospitalizations due to Covid-19 reach critical levels. And/or campus and city testing and contact tracing capacity is completely overwhelmed.

- No in-person gatherings
- Employees work from home unless essential
- Class online only, unless critical to academic progress
- No Res Life & Housing visitation/movement other than essential activities
- Suspension of high-risk activities on campus
- Dining grab and go, consider delivery
- Essentially a campus wide quarantine
